

# Energy Efficiency Grants for Communities

The House Appropriations Committee approved Senate File 452, which provides \$1 million in grants to communities for energy efficiency projects. The grants will be eligible for cities, counties, non-profit organizations, energy

efficiency organizations and environmental organizations.

The grants are intended to help communities to reduce energy consumption and make communities in the state more sustainable and energy efficient. The grant program is

created and administered by the Iowa Office of Energy Independence. The funding for the grants will come from the Iowa Power Fund.

The bill is now before the full House for consideration.
